

Dear Residents, Responsible Parties, Vendors, and Staff Members,

On December 15th, we were notified that a staff member tested positive for Covid-19. Testing began this day for all residents and staff. The residents' testing was completed on December 15, 2021, and we did have one of our residents test positive. We will continue the protocol for testing all staff, regardless of vaccine status twice weekly for the next two weeks. As we continue to test staff over the next two weeks, we will update our website on any other positive cases and on visitation (<https://mcgregoramasa.org/>).

We continue to take the appropriate steps to contain the infection at the center, through surveillance testing and monitoring signs and symptoms of staff and residents. We continue to ask staff, residents, families, and others to monitor themselves for any symptoms of the illness and we ask that if they do not feel well to not come to the facility.

It is anticipated that the positivity rate will continue to increase as the Delta Variant spreads throughout the United States.

I highly encourage residents that have not been vaccinated, to begin the process at our next clinic on Thursday, December 16, 2021. Please contact Heidi Foss, Infection Preventionist, if you wish to have your family member vaccinated. The facility pharmacy is providing the Moderna vaccine.

If the situation changes, if more cases are identified, or we sense that additional communications are warranted, we will advise everyone in a timely manner.

Please visit The Gardens of McGregor's website for weekly updates at <https://mcgregoramasa.org/>.

In the meantime, if you have questions or concerns, please contact me.

Sincerely,

Yvette Bozman, LMAA

Yvette Bozman, Executive Director
